Boxed product containing the college textbook **Visual Basic .NET How to Program, 2/e** and the **Visual Basic .NET Multimedia Cyber Classroom** interactive Windows®-based CD-ROM. Contains almost all content from **Visual Basic .NET for Experienced Programmers**, except for the chapter on the Mobile Internet Toolkit.

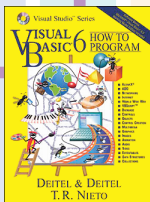

Visual Basic® .NET How to Program, 2/e¹
ISBN: 0-13-029363-6

Introductory and intermediate Visual Basic .NET coverage for college students and professionals. Contains almost all content from **Visual Basic .NET for Experienced Programmers**, plus introductory material, appendices, self-review exercises with answers and chapter exercises. Supported by academic ancillary materials required for college courses.

For introductory and intermediate
college courses and for professionals who want
to move to Visual Basic .NET

For experienced programmers
who want to learn Visual Basic .NET
through the intermediate level

**Visual Basic® 6 How to Program, 1/e
Legacy Technology**
ISBN: 0-13-456955-5

We recommend the **Complete Visual Basic .NET Training Course** which includes **Visual Basic .NET How to Program, 2/e** and the **Visual Basic .NET Multimedia Cyber Classroom** CD for Windows®, as the best value and the most powerful learning tool for readers who want to pursue Visual Basic .NET programming through the intermediate level.

Note: The three columns of products (indicated by different background colors) share a common content base, so readers should purchase products from only one column.

Note: If you have additional questions, please call (978) 461-5880 or write to deitel@deitel.com.
